

# SUPPR

## Summer Undergraduate Program for Planetary Research

The Summer Undergraduate Program for Planetary Research, or SUPPR, is an eight-week summer internship for undergraduates majoring in geology and related sciences. The program helps students gain educational experience in their fields of study while contributing to NASA missions and science.

Students work under the direction of a NASA-sponsored planetary science investigator at various science institutions.

### 2022 RESEARCH LOCATIONS INCLUDE:

**California Institute of Technology**  
Pasadena, CA

**Cornell University**  
Ithaca, NY

**Georgia Institute of Technology**  
Atlanta, GA

**Louisiana State University**  
Baton Rouge, LA

**NASA Goddard Space Flight Center**  
Greenbelt, MD

**NASA Goddard Space Flight Center**  
Greenbelt, MD and Iceland (field work)

**Planetary Science Institute**  
Tucson, AZ

**Princeton University**  
Princeton NJ

**University of Arkansas**  
Fayetteville, AR

**University of Rochester**  
Rochester, NY

**University of Texas at Austin**  
Austin, TX

**Wesleyan University**  
Middletown, CT
