Plate 13. The trajectory of New Horizons (NH) and the locations of the planets, as projected on the ecliptic plane, are displayed. Different colors are used for different years. NH was launched on January 19, 2006, had its closest approach to Jupiter on February 28, 2007, and will encounter Pluto in July 2015. From Young et al. (2008).

Accompanies chapter by Weaver and Stern (pp. 557–571).
