

Around the Block: An Ice Tour

WHAT TO DO...

Take a tour "around the block" (of ice, that is)!

What do you observe about I C E ?

Use the magnifying glasses, flashlights, magnets and your eyes and fingers to investigate!

- What color is the ice?
- What do you observe in using the magnifying glass?
- Is ice magnetic? Does a magnet stick to it?
- Describe how it feels (don't forget to describe the state of the ice!)

What else do you observe?
