

The Lunar and Planetary Institute Presents

COSMIC EXPLORATIONS: A SPEAKER SERIES

June 18, 2009

STAR CITIES OF THE MILKY WAY

Continuing our celebration of the 400th anniversary of Galileo's first use of the telescope, Dr. Pilachowski shares new insight into the evolution and identity of the globular star clusters that surround our galaxy. Modern telescopes give us a glimpse into the early universe's formation of stars and basic elements, all within these aging clusters shining with the power of a hundred thousand suns.

This FREE presentation at 7:30 p.m. is intended for inquisitive adults and will be followed by a light reception and an opportunity to meet Dr. Catherine Pilachowski.

Speaker presentations held at
USRA's Lunar and Planetary Institute
3600 Bay Area Boulevard, Houston TX
