

## Hopping Across Our Solar System!

1. I'm the ONE star in our Solar System!

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

2. I orbit the Sun *very* quickly - my "year" is only 88 days long.

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

3. I have such thick clouds that you can't even see my face. My atmosphere is mostly carbon dioxide.

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

4. I have beautiful blue oceans, an atmosphere rich with oxygen, and temperatures that are just right for you

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

5. Two little rovers are on my surface. I'm the red planet because my surface is rusty.

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

6. I'm the BIGGEST planet in our whole Solar System - and I'm made of gas. A giant red storm swirls across my surface.

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

7. While all the gas giant planets have rings, mine are the largest - *and prettiest!*

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

8. I'm the first planet seen by a telescope! I'm the only planet that spins on its side.

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

9. I'm a gas planet and my surface is blue because I have lots of methane gas. I have the *fastest* winds in the Solar System - 1200 miles per hour!

My name is: \_\_\_\_\_ Hops \_\_\_\_\_

10. I'm the smallest - and farthest - planet in the whole Solar System! Because I am so far away, it takes me 248 Earth-years to go *once* around the Sun!

My name is: \_\_\_\_\_ Hops \_\_\_\_\_
