MOON

POWERED BY:
NASA'S SCIENCE MISSION DIRECTORATE

FREE PUBLIC WEBCASTS!

Join us monthly as MyMoon hosts webcasts featuring lunar scientists, authors, and artists. Each presenter speaks about themselves for a few minutes then the rest of the conversation is up to you! Check the MyMoon website for more information on connecting to webcasts!

November 28th – Tom Carlone, Polaris Rover

Excited about the recent success of the Curiosity rover on Mars and hungry for robotic exploration on the Moon? Join us as we chat with Tom Carlone! He will discuss the (GLXP) Astrobotic Team's Polaris rover – a lunar rover prototype for prospecting ice at the poles of the Moon.

December 13th –Blaze Sanders, GLXP Team JURBAN

Join us with Blaze Sanders, Program Manager of the JURBAN Google Lunar X PRIZE team, as he showcases the team progress and exposes the general public - especially underserved and disadvantaged groups - to space commercialization. We will discuss the unique technical aspects of building a lunar robot, the commercial need JURBAN is trying to fulfill, and some of the political concerns relating to the competition.

Coming in 2013...

January 9th – Dr. Michelle Kirchoff, SwRI

Michelle studies the surface geology of planets and moons. Join us as she discusses her primary interest - impact craters and their distributions!

Stay Tuned to MyMoon for details!

BE THERE!!!
...WE KNOW WHERE YOU LIVE

MyMoon is YOUR space for the Moon & More!

Through MyMoon, the Lunar and Planetary Institute provides a place for young adults to explore the science, culture, and the arts connected to the Moon, solar system, and Space Exploration (Missions)!
