

Executive Summary

Date Prepared: August 29, 2007

Presenter's Name: D. Larry Clark
Presenter's Title: Chair
Presenter's Organization/Company: AIAA Space Resources Technical Committee

Presentation Title

ISRU Development Roadmap — AIAA Perspective

Key Ideas

The AIAA Space Resource Technical Committee has developed plans and timelines to develop In Situ Resource Utilization for lunar colonization. This roadmap incorporates NASA technology development for early missions up to and including the outpost. The SRTC roadmap also includes further developments that can support eventual commercialization of the products and support lunar colonization. This presentation will give an overview of the AIAA Space Resources Technical Committee lunar resource development roadmap that will enhance the NASA lunar exploration plan and provide a sustainable and affordable approach to exploration.
