

Program

73rd Annual Meeting of the Meteoritical Society

July 26–30, 2010
New York City, New York

To access the abstracts, use the hand tool of your Acrobat Reader
to click on the name of any session.
After the full program listing for that session appears,
click on the title of a presentation to view the abstract for that presentation.

Monday, July 26, 2010

8:30 a.m.	Ballroom	Formal Opening
9:00 a.m.	Skyline	Asteroid Remnants of the Cores of Early Planetesimals, and Where are Their Mantles?
8:50 a.m.	Ballroom	Toward Understanding Chondrules and Their Formation (Dedicated to Gero Kurat)
1:20 p.m.	Skyline	Primitive Achondrites and the Almahata Sitta Fall (Dedicated to Finn-Ulf Møller)
1:30 p.m.	Ballroom	Organic Molecules and Chirality in Extraterrestrial Materials and the Cosmos
7:00 p.m.	LeFrak Theater at AMNH	Barringer Invitational Lecture

Tuesday, July 27, 2010

8:30 a.m.	Skyline	Impact Processes and Impact Crater Structures
8:30 a.m.	Ballroom	Solar Systems Before and During Planet Formation
1:30 p.m.	Skyline	Material from Other Stars Preserved in Meteorites and Comets
1:20 p.m.	Ballroom	Micrometeorites and Interplanetary Dust Particles (Dedicated to Brian Mason)
3:50 p.m.	Ballroom	Carbonaceous Chondrites: Chronology and Mineralogy (Dedicated to Brian Mason)
5:15 p.m.	Ballroom	Awards Ceremony (Dedicated to Ardis Nier)
6:30 p.m.	Forum	Poster Session
		<i>Fall and Recovery of Meteorites Around the World</i>
		<i>Achondrite Meteorites and Meteorites from the Moon</i>
		<i>New Developments in Extraterrestrial Sample Analysis and Space Exploration</i>
		<i>Asteroid Remnants of the Cores of Early Planetesimals, and Where are Their Mantles?</i>
		<i>Organic Molecules in Meteorites: Techniques and Contamination</i>

Tuesday, July 27, 2010 (Posters continued)

[*Toward Understanding Chondrules and Their Formation*](#)
[*Material from Other Stars Preserved in Meteorites and Comets*](#)
[*Ordinary and Enstatite Chondrites: Histories and Isotopic, Chemical and Physical Properties*](#)
[*Solar Systems Before and During Planet Formation*](#)

Wednesday, July 28, 2010

8:30 a.m. Skyline [Martian Meteorites: Evidence for Fluids, Magmatic Processes, and Impact Processes](#)
 8:30 a.m. Ballroom [Ordinary and Enstatite Chondrites: Their Origins and Physical Properties](#)
 11:45 a.m. Ballroom Meteoritical Society Business Meeting

Thursday, July 29, 2010

9:30 a.m. Ballroom [Plenary Lectures](#)
 1:30 p.m. Skyline [Asteroids: Composition, Evolution, Dynamics and Connection to Meteorites](#)
 1:30 p.m. Ballroom [First Solar System Solids: Refractory Inclusions in Meteorites](#)
 6:30 p.m. Forum Poster Session
[*Curation, Education and Public Outreach \(Dedicated to O. Richard Norton\)*](#)
[*Carbonaceous Chondrites and Their Parent Bodies*](#)
[*Parent Body Regolith: Simulation and Observation*](#)
[*Shock Effects in Rocks, Minerals and Meteorites*](#)
[*First Solar System Solids: Refractory Inclusions in Meteorites*](#)
[*Isotopes: Carbon, Nitrogen, Chlorine, and Barium*](#)
[*Sample Return Mission Results: Genesis \(Solar Wind\) and Stardust \(Cometary Dust\)*](#)
[*Infrared Spectroscopy: Meteorites, Parent Bodies, and Laboratory Micrometeorites and Interplanetary Dust Particles*](#)
[*Impact Processes and Impact Crater Structures: Traces of Collisions*](#)
[*Martian Meteorites: Isotopic Studies, Chronology, and Water*](#)
[*Mars: Petrology and Geochemistry from Meteorites, Planning for Sample Return*](#)

Friday, July 30, 2010

8:30 a.m. Skyline [Extraterrestrial Basalts: Vesta, Angrites and the Moon](#)
 8:30 a.m. Ballroom [Sample Return Mission Results: Genesis \(Solar Wind\) and Stardust \(Cometary Dust\)](#)
 10:50 a.m. Ballroom [Isotopes 1: Light Elements Through Calcium, Mostly Be, B, K and Ca](#)
 1:30 p.m. Skyline [Deciphering Secondary Processes on Primitive Asteroids](#)
 1:30 p.m. Ballroom [Isotopes 2: ²⁶Al/²⁶Mg, Transition Metals, and Beyond](#)
