Subject: TP3 – New views of Venus at EPSC

Dear colleagues

I would like to invite you to submit abstracts to the session TP3 – New views of Venus at the EPSC meeting in Potsdam (Sept. 13.–18. 2009).

This session will focus on the surface and interior of Venus and the evolution of the planet. In view of the stunning results by Venus Express and in waiting for the JAXA Venus Climate Orbiter mission we want to take a look at the new view we have now of Venus. The goal is a synthesis of new insights gained with Venus Express, progress in laboratory work, new mapping efforts and recent progress in modeling of the evolution of the planet. The session will be complementary to TP6 on Planetary atmospheres.

So please submit your abstract before May 22.

More information on the meeting can be found at
<http://meetings.copernicus.org/epsc2009/index.html>.

Please distribute this invitation to colleagues who I might have forgotten

See you in Potsdam, Jörn Helbert
