

Science Engagement

The LPI Science Engagement team collaborates with multiple partners nationwide to make current Earth and planetary science content available to all audiences.

- Collaborates with scientists to assist them in their public engagement efforts through resources and seminars such as [Sharing Planetary Science](#).
- Disseminates planetary science content and resources such as our [Explore](#) modules, infused with research-based best practices.
- Conducts space science experiences and events for diverse audiences, such as [Cosmic Exploration Speakers Series](#) and [Sky Fest](#).
- Supports the success of students and early-career researchers through workforce development programming and resources.
- Manages [digital and physical materials](#) for use by scientists and engagement specialists, including exhibits, posters, audio recordings, and ALTA spectrometer kits.

"[LPI's public engagement programs] will have huge impact across the country as we work with our communities."
