

ROCKY RUBBLE PILES

Data Sheet

Record the time and temperatures of your asteroid models.
Interpret your data to infer which models are rocky (made of rock) and which are rubble (made of sand).

My temperatures are taken in **Celsius** / **Fahrenheit** (circle one)

	Time:	Time:	Time:	Time:	Time:	Time:	Time:	Time:	Time:	Time:	Rocky or Rubble?
<i>Example</i>	45°	44°	45°	50°	56°	58°	62°	64°	69°	72°
