

I weighed the most on these planets:

They have a lot / not much gravity.

I weighed the least on these planets:

They have a lot / not much gravity.

Which properties **do not** influence a planet's gravity?

- presence of an atmosphere
- planet diameter
- planet mass
- planet temperature
- distance from the Sun

Which properties **do** cause a planet to have more or less gravity?

- presence of an atmosphere
- planet diameter
- planet mass
- planet temperature
- distance from the Sun
