

# Further Exploration

## Classroom Resources

[Exploring the Moon](#) —An integrated portfolio of hands-on activities that explore what we know about the Moon, what we have learned through lunar samples from the Apollo missions, and where we may go next. Upper elementary through high school.

[Exploring Planets in the Classroom: The Moon](#) —A suite of hands-on activities and supporting materials that investigate lunar landforms, regolith formation, and more.

[Educator Resources](#) —Explore lunar phases and eclipses, formation of the Moon, lunar processes, future lunar outpost sites, and more through hands-on activities, background information, and presentations.

## Online Discovery

Explore NASA's Apollo Program. <http://www.nasm.si.edu/collections/imagery/apollo/apollo.htm> and <http://history.nasa.gov/apollo.html>

NASA's Lunar and Planetary Science pages provide an overview of past, present, and future lunar missions. <http://nssdc.gsfc.nasa.gov/planetary/planets/moonpage.html>

The Lunar and Planetary Institute has compiled a comprehensive site of existing lunar images, data, studies, and information. <http://www.lpi.usra.edu/lunar>

The research of NASA's Science Mission Directorate focuses on understanding the origin, evolution, and nature of our solar system, including our Moon. <http://science.nasa.gov>

## About this Poster

This is one of a three-poster set that examines how our geologic understanding of the Moon will be used as we plan to live and work there in the future. The poster front, designed for sixth- to ninth-grade students, explores how our Moon formed and has changed through time; this history is recorded in the features the students see when they look at the Moon. The poster back is designed to provide educators with background information, ideas for lessons, and resources to support further student exploration. The complete set of posters can be found at [http://www.lpi.usra.edu/education/moon\\_poster.shtml](http://www.lpi.usra.edu/education/moon_poster.shtml).

*Content Development:* Stephanie Shipp and Christine Shupla, Lunar and Planetary Institute; *Scientific Oversight:* David Kring, Allan Treiman, and Walter Kiefer, Lunar and Planetary Institute; *Graphic Design:* Leanne Woolley, Lunar and Planetary Institute.

*Concept Development and Content Review:* Cassandra Runyon, E/PO Lead, Moon Mineralogy Mapper, College of Charleston; Stephanie Shipp, Lunar and Planetary Institute; Jaclyn Allen, Astromaterials Research and Exploration Science, NASA Johnson Space Center; Marilyn Lindstrom, NASA Headquarters.

*Content Review:* Dr. Carlton Allen, Astromaterials Curator, Astromaterials Research and Exploration Science, NASA Johnson Space Center; Dr. Ben Bussey, Deputy Principal Investigator, Miniature Synthetic Aperture Radar (Mini-SAR), Johns Hopkins University, Applied Physics Laboratory; Mr. Brian Day, E/PO Lead, Lunar Crater Observation and Sensing Satellite, NASA Ames Research Center; Dr. Clive Neal, Chair, Lunar Exploration Analysis Group, University of Notre Dame; Dr. Carlé Pieters, Principal Investigator, Moon Mineralogy Mapper Instrument, Brown University; Ms. Stephanie Stockman, E/PO Lead, Lunar Reconnaissance Orbiter Mission, NASA Goddard Space Flight Center; Dr. Paul Spudis, Principal Investigator, Miniature Synthetic Aperture Radar (Mini-SAR), Lunar and Planetary Institute; Dr. Jeffrey Taylor, Hawaii Institute of Geophysics and Planetology, University of Hawaii.

Appreciation is extended to the students and teachers of McWhirter Elementary in Webster, Texas, and Sugarland Middle School, in Sugarland, Texas, for their insightful critique of the poster design and content.
