

Twin Peaks, Mars Pathfinder Landing Site, Mars

The Twin Peaks are modest-sized hills to the southwest of the Mars Pathfinder landing site. The Mars Pathfinder landing site is at the mouth of Ares Vallis, a large outflow channel that emptied into the Chryse Basin. Vast floodwaters poured over this site several billion years ago. The peaks are approximately 30–35 meters (100 feet) tall. North Twin is approximately 860 meters (2800 feet) from the lander, and South Twin is about a kilometer away (3300 feet).
