

Weather Symbols

Leif was trying to interpret a weather map but couldn't remember the symbols for different types of fronts. Which symbol matches which front?

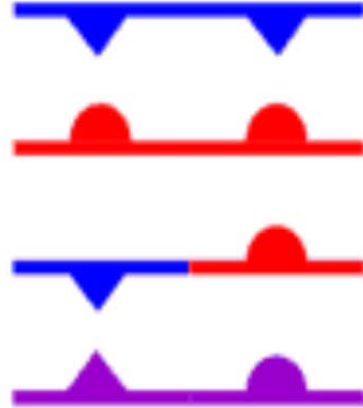

Please draw a line to match the symbol to the type of front:

Warm Front

Occluded Front

Stationary Front

Cold Front

Do you have any techniques you use to help you remember which is which?

What type of weather should you expect after each type of front passes? Check the appropriate box

	Warm	Cold
Which front is most likely to produce rain without thunderstorms?		
Which front is more likely to produce quickly-passing thunderstorms?		
Which front moves fastest?		
Which front is followed by cooler temperatures?		
Which front is usually followed by many hours or days of rain?
