Astromaterials Data Repository Study

- Community survey discussed at Spring 2017 meeting put on hold because...
- Planetary Science Division then requested that ARES study how to define the requirements for a notional Astromaterials submission-based data repository for NASA-funded research
- Data Repository Study was then put on hold by Headquarters request to execute various upgrades and updates to Apollo data infrastructure
- Informatics Panel is keeping abreast of the HQ request to Curation for sample analysis data, and is standing by to coordinate CAPTEM support
