

5/11/66

BENDIX SYSTEMS DIVISION ANN ARBOR, MICH.
Revision of ALSEP Antenna Assembly
Specification

NO. ATM-267	REV. NO.
PAGE <u>1</u> OF <u>2</u> PAGES	

This is an unscheduled ATM describing changes in the ALSEP Antenna Assembly Specification.

Prepared by: *J E Hendrickson*
J. E. Hendrickson

Approved by: *V E Hutton*
V. E. Hutton

5/11/66

Because of the necessity of modifying some of the requirements of the Antenna Assembly Specification during subcontract negotiations and the undesirable practice of sending "system" documents (referenced in AL 310100) to subcontractors, a new antenna specification has been prepared.

This new specification is not considered a formal release, but a release by the Data Subsystem Group for information only.

The following document replacement applies:

<u>Obsolete document</u> <u>No. & Title</u>	<u>Replacement document</u> <u>No. & Title</u>
AL 310100 "Antenna Specification"	ARD-116 (REVISION A) "Exhibit B - Antenna Assembly Specification"

Persons requiring "up-to-date" technical information for this component may contact J. E. Hendrickson for copies of ARD-116.
