Briefing Topic:

## Outline for Crew Post-Traverse Debriefing

David A. Kring

# Briefing Sequence

---

- **What is the crew's perception of the traverse and the science lessons learned?**
- **Summarize the Science Operation Room's view of the day**
- **Clarify or reconcile differences; ask crew why they did unexpected things (not to criticize them, but to understand them)**
- **Discuss whether/how the day's results affect the next day's traverse plans**

# Briefing Details & Outcomes

---

- **Daily traverse briefings are nominally 15 minutes long, but can be extended if crew requests**
- **The debriefing is used to provide crew with perspective and provide guidance useful for the following day's traverse**
- **Science PI uses information to modify (if necessary) the following day's traverse**
- **Operational issues are passed to the Traverse Director or appropriate support team members (e.g., communications, rover)**
