

15506 – 22.9 grams
15508 – 1.4 grams
Regolith Breccia

Figure 1 a,b: Photos of two sides of 15506. Cube is 1 cm. S71-44527 and 529.

Introduction

15506 and 15508 are glass-coated pieces of regolith breccia similar to 15505 in the same bag and may be pieces of the larger breccia – see also section on 15501. They have not been studied and there are no thin sections.

Figure 2: This wee-bitty thing is an afterthought, as it has never been, and never be, studied! Call it 15508.
