

February 2020  
TO: Dr. Lori Glaze, NASA HQ  
FROM: Jeffrey M. Moore, OPAG Chair, NASA ARC

Dear Lori,

Please find attached the Findings arising from the OPAG meeting held in February at LPI in Houston. If you think useful, I would be glad to discuss by phone these findings. I'd be happy to work out a time with Curt that will work for you.

The OPAG Steering Committee wishes to express our gratitude for your backing the PI Launchpad workshop that Dr. Erika Hamden of the University of Arizona organized in November 2019. JPL's Planetary Science Summer School is another example of a workshop that offers a training ground for future mission PIs. The OPAG Steering Committee thanks you for your strong support for holding similar future workshops to broaden and diversify potential future PIs.
