

OPAG newsbrief
27 April 2015

Dear Colleagues,

It is with great delight that I draw your attention to the new look and new organization of the OPAG website at <http://www.lpi.usra.edu/opag/>.

As before, you will find the most recent and upcoming OPAG meeting announcements on the homepage, along with the most recent version of our science goals document. Material from all the older OPAG meetings can be found under the "Meetings" bar in the menu on the left.

Reports we've assembled are found by clicking on "Reports" in the menu bar, unless they were reports to PSS. Those and other PSS presentations are under "OPAG/PSS". These newsbriefs I've been sending out, plus all the older ones, are under "Newsletters".

If you have a conference or workshop you think would be of interest to the outer planets community we now will be posting those under "Meetings of Interest". Other items such as Icarus special issue calls for papers will be under "Announcements".

Considering the importance of power sources and other new technologies to our community these topics have a special page, under "Power and Technologies".

There have been numerous Europa mission studies over the past decades – the Clipper concept is featured on the OPAG homepage, while older studies are archived under "Europa Mission Concepts".

Lots of other useful material can be found under "Missions", "Resources", "Archive documents", and "Decadal Survey documents". If you have anything that you think would be of use and should be posted please send it to me – this is our outer solar system community corporate memory!

I am most excited of all to point you to the menu tab titled "OPAG Discussion Board". This will be a place for us all to post our thoughts and especially our vision for the future. Please use it to say what you think!! Right now the over-arching science themes part of our new science goals document is under construction – I will be looking to this discussion board for inspiration...

Finally, remember, we have set a date for the summer OPAG meeting. It will be August 24-26 at JHU/APL. Please mark your calendars!

Sincerely,
Candy Hansen
OPAG Chair
