

Lunar Bases and Space Activities of the 21st Century

W. W. MENDELL, EDITOR

**Lunar and Planetary Institute
Houston**

Library of Congress Cataloging-in-Publication Data

Main entry under title:

Lunar bases and space activities of the 21st century.

Papers from a NASA-sponsored, public symposium hosted by the National Academy of Sciences in Washington, D.C., Oct. 29-31, 1984.

1. Lunar bases--Congresses. 2. Mars (Planet)--Exploration--Congresses. I. Mendell, W. W. (Wendell W.), 1941-. II. Lunar and Planetary Institute. III. United States. National Aeronautics and Space Administration.

Cover illustration: Two inhabitants of the Moon overlook an advanced lunar installation from a museum construction site. The original, primitive lunar base lies to the left of a large electromagnetic launch facility, which dominates the vista. An array of solar dynamic generators on the horizon supplement the power from a nuclear reactor to operate greenhouses, industrial processing plants, scientific research laboratories, and a spaceport. Artist: Pat Rawlings, Eagle Engineering Co., Houston, Texas.

CONTENTS

PROLOGUE 1

1 / THE SYMPOSIUM: KEYNOTE SPEECHES 5

Remarks on the Lunar Base / 7
James M. Beggs

The Challenges and Opportunities of a New Era in Space: How Will We Respond? / 11
G. A. Keyworth II

In Space: One World United / 15
Walter J. Hickel

An Opportunity for Openness / 21
Arthur Kantrowitz

Thoughts on a Lunar Base / 25
Edward Teller

2 / LUNAR BASE CONCEPTS 33

Lunar Bases: A Post-Apollo Evaluation / 35
Paul D. Lowman Jr.

Evolution of Concepts for Lunar Bases / 47
Stewart W. Johnson and Ray S. Leonard

Strategies for a Permanent Lunar Base / 57
Michael B. Duke, Wendell W. Mendell, and Barney B. Roberts

Preliminary Design of a Permanently Manned Lunar Surface Research Base / 69
Stephen J. Hoffman and John C. Niehoff

Merits of A Lunar Polar Base Location / 77
James D. Burke

Nuclear Energy—Key to Lunar Development / 85
David Buden and Joseph A. Angelo Jr.

Nuclear Powerplants for Lunar Bases / 99
J. R. French

3 / TRANSPORTATION ISSUES 109

Mission and Operations Modes for Lunar Basing / 111
Gordon R. Woodcock

Impact of Lunar and Planetary Missions on the Space Station / 125
G. R. Babb, H. P. Davis, P. G. Phillips, and W. R. Stump

- A Moon Base/Mars Base Transportation Depot / 141
Paul W. Keaton
- Achromatic Trajectories and the Industrial-Scale Transport of Lunar Resources / 155
T. A. Heppenheimer
- A Lunar-Based Propulsion System / 169
Sanders D. Rosenberg
- Launching Rockets and Small Satellites from the Lunar Surface / 177
K. A. Anderson, W. M. Dougherty, and D. H. Pankow

4 / LUNAR SCIENCE 187

- The Need for a Lunar Base: Answering Basic Questions about Planetary Science / 189
G. Jeffrey Taylor
- Geochemical and Petrological Sampling and Studies at the First Moon Base / 199
Larry A. Haskin, Randy L. Korotev, David J. Lindstrom, and Marilyn L. Lindstrom
- A Closer Look at Lunar Volcanism from a Base on the Moon / 211
D. T. Vaniman, G. Heiken, and G. J. Taylor
- Advanced Geologic Exploration Supported by a Lunar Base: A Traverse Across the Imbrium-Procenarum Region of the Moon / 223
Mark J. Cintala, Paul D. Spudis, and B. Ray Hawke
- Search for Volatiles and Geologic Activity from a Lunar Base / 239
Larry Jay Friesen
- Unmanned Spaceflights Needed as Scientific Preparation for a Manned Lunar Base / 245
Don E. Wilhelms
- The Next Generation Geophysical Investigation of the Moon / 253
L. L. Hood, C. P. Sonett, and C. T. Russell
- Geophysics and Lunar Resources / 265
D. Strangway
- Surface Electromagnetic Exploration Geophysics Applied to the Moon / 271
Mark E. Ander

5 / SCIENCE ON THE MOON 279

- Astronomical Interferometry on the Moon / 281
Bernard F. Burke
- A Moon-Earth Radio Interferometer / 293
Jack O. Burns
- A Very Low Frequency Radio Astronomy Observatory on the Moon / 301
James N. Douglas and Harlan J. Smith

- Lunar Based Gamma Ray Astronomy / 307
Robert C. Haymes
- Irradiation of the Moon by Galactic Cosmic Rays and Other Particles / 315
James H. Adams Jr. and Maurice M. Shapiro
- Celestial Sources of High-Energy Neutrinos as Viewed from a Lunar Observatory / 329
Maurice M. Shapiro and Rein Silberberg
- A Lunar Neutrino Detector / 335
M. Cherry and K. Lande
- Neutrino Measurements on the Moon / 345
Albert G. Petschek
- Mass Extinctions and Cosmic Collisions: A Lunar Test / 349
Friedrich Hörz

6 / LUNAR CONSTRUCTION 361

- Lunar Base Design / 363
Peter Land
- A Surface-Assembled Superstructure Envelope System to Support Regolith Mass-Shielding for an Initial-Operational-Capability Lunar Base / 375
Jan Kaplicky and David Nixon
- Concrete for Lunar Base Construction / 381
T. D. Lin
- Concrete and Other Cement-Based Composites for Lunar Base Construction / 391
J. Francis Young
- Magma, Ceramic, and Fused Adobe Structures Generated *In-Situ* / 399
E. Nader Khalili
- Lava Tubes: Potential Shelters for Habitats / 405
Friedrich Hörz
- Design of Lunar-Based Facilities: The Challenge of a Lunar Observatory / 413
Stewart W. Johnson and Ray S. Leonard
- Environmental Considerations and Waste Planning on the Lunar Surface / 423
Randall Briggs and Albert Sacco Jr.

7 / LUNAR MATERIALS AND PROCESSES 433

- Toward a Spartan Scenario for Use of Lunar Materials / 435
Larry A. Haskin
- Mining for Lunar Base Support / 445
E. R. Podnieks and W. W. Roepke

- Electrostatic Concentration of Lunar Soil Minerals / 453
William N. Agosto
- In Situ* Rock Melting Applied to Lunar Base Construction and for Exploration Drilling and
Coring on the Moon / 465
John C. Rowley and Joseph W. Neudecker
- Microwave Processing of Lunar Materials: Potential Applications / 479
Thomas T. Meek, David T. Vaniman, Franklin H. Cocks, and Robin A. Wright
- Mechanical Properties of Lunar Materials Under Anhydrous, Hard Vacuum Conditions:
Applications of Lunar Glass Structural Components / 487
James D. Blacic
- Guide to Using Lunar Soil and Simulants for Experimentation / 497
J. H. Allton, C. Galindo Jr., and L. A. Watts
- Fractional Distillation in a Lunar Environment / 507
Donald R. Pettit
- Lunar Machining / 519
William Lewis
- 8 / OXYGEN: PRELUDE TO LUNAR INDUSTRIALIZATION 529**
- A Parametric Analysis of Lunar Oxygen Production / 531
Michael C. Simon
- Lunar Oxygen Production from Ilmenite / 543
Michael A. Gibson and Christian W. Knudsen
- Oxygen Extraction from Lunar Materials: An Experimental Test of an Ilmenite Reduction
Process / 551
Richard J. Williams
- A Carbothermal Scheme for Lunar Oxygen Production / 559
Andrew Hall Cutler and Peter Krag
- Lunar Regolith Fines: A Source of Hydrogen / 571
James L. Carter
- Hydrogen Recovery From Extraterrestrial Materials Using Microwave Energy / 583
D. S. Tucker, D. T. Vaniman, J. L. Anderson, F. W. Clinard Jr., R. C. Feber Jr., H. M. Frost,
T. T. Meek, and T. C. Wallace
- Microbial Extraction of Hydrogen from Lunar Dust / 591
David C. White and Peter Hirsch
- Hydrogen and Water Desorption on the Moon: Approximate On-Line Simulations / 603
G. E. Blanford, P. Børgeesen, M. Maurette, W. Möller, and B. Monart
- An Analysis of Alternate Hydrogen Sources for Lunar Manufacture / 611
Herbert N. Friedlander

9 / LIFE SUPPORT AND HEALTH MAINTENANCE 621

The Evolution of CELSS for Lunar Bases / 623

R. D. MacElroy, Harold P. Klein, and M. M. Averner

Wheat Farming in a Lunar Base / 635

Frank B. Salisbury and Bruce G. Bugbee

Metabolic Support for a Lunar Base / 647

R. L. Sauer

Implementing Supercritical Water Oxidation Technology in a Lunar Base Environmental Control/Life Support System / 653

Melaine Meyer Sedej

Radiation Transport of Cosmic Ray Nuclei in Lunar Material and Radiation Doses / 663

R. Silberberg, C. H. Tsao, J. H. Adams Jr., and John R. Letaw

Aerosol Deposition Along the Respiratory Tract at Zero Gravity: A Theoretical Study / 671

B. E. Lehnert, D. M. Smith, L. M. Holland, M. I. Tillery, and R. G. Thomas

Toward the Development of a Recombinant DNA Assay System for the Detection of Genetic Change in Astronauts' Cells / 679

Susan V. Atchley, David J.-C. Chen, Gary F. Strniste, Ronald A. Walters, and Robert K. Moyzis

Flow Cytometry for Health Monitoring in Space / 687

James H. Jett, John C. Martin, George C. Saunders, and Carleton C. Stewart

10 / SOCIETAL ISSUES 699

Dreams and Realities: The Future in Space / 701

John Logsdon

The Budgetary Feasibility of a Lunar Base / 711

Wallace O. Sellers and Paul W. Keaton

Lunar Stations: Prospects for International Cooperation / 717

Phillip M. Smith

Soviet Lunar Exploration: Past and Future / 725

James E. Oberg

Legal Responses for Lunar Bases and Space Activities in the 21st Century / 735

Amanda Lee Moore

Extraterrestrial Law and Lunar Bases: General Legal Principles and a Particular Regime Proposal (INTERLUNE) / 741
