

The Lunar and Planetary Institute Introduces

COSMIC EXPLORATIONS: A SPEAKER SERIES

Series Premier — November 1, 2007

A ROGUE ASTEROID AND THE DINOSAURS' EXTINCTION

One of the discoverers of the impact crater that is linked to the extinction of dinosaurs will describe his search for the impact site and how the impact event created a global environmental catastrophe that extinguished most life on planet Earth.

This FREE presentation at 7:30 p.m. is geared for all inquisitive adults and will be followed by a light reception and an opportunity to meet Dr. Kring.

Speaker presentations held at
USRA's Lunar and Planetary Institute
3600 Bay Area Boulevard, Houston TX
