Spheres of Influence

WindSync partners with the Lunar and Planetary Institute (LPI) to combine music and space in a follow up to their hit Voyager concert program of 2017. In a new, lunar-focused program, Dr. David A. Kring from the LPI will present a mini-lecture about the Apollo missions, and WindSync will premiere music by Marc Mellits that honors the 50th anniversary of the Apollo 11 Moon landing. The hard-driving rhythms of Mellits' minimalist, funk-inflected music will recall the technological obsession of the Space Race and the music styles emerging in the 1960s.
