

# SUPPR

(formerly PGGURP)

## Summer Undergraduate Program for Planetary Research

The Summer Undergraduate Program for Planetary Research (SUPPR) invites undergraduate students who have not yet begun graduate studies and who are interested in learning about research in planetary geoscience to participate. We pair qualified undergraduates with NASA-sponsored planetary geology and geophysics investigators at locations around the country for eight weeks during the summer. The program is designed to help students gain educational experience in their fields of study while contributing to NASA missions and science.

**8-week program** (June 1 – August 31, 2023)

**Stipends for internship, travel, housing, and expenses**

**Now Accepting Applications**

Visit [www.lpi.usra.edu/suppr](http://www.lpi.usra.edu/suppr) for details.

APPLICATION DEADLINE:  
**FEBRUARY 10, 2023**  
**11:59 PM CST**

Applications are only accepted via the electronic application form found at the SUPPR website.
