

A large, curved, yellowish-orange image showing the upper atmosphere of Venus, with swirling patterns and a bright, glowing edge.

Venus Upper Atmosphere Investigations

Science and Technical Interchange Meeting (STIM)

January 24, 2013

NASA GRC Guerin Conference Center

The STIM will foster a science discussion on goals, objectives, priorities, and significance of the Venus upper atmosphere and how the science would contribute to overall exploration of Venus. We will discuss the desired measurements and requirements to achieve potential Venus upper atmosphere science and spacecraft concepts and technologies that could reach the Venus UA and collect and return the desired data.
